Controls & Commissioning

Benchmarking

# Building Energy Usage

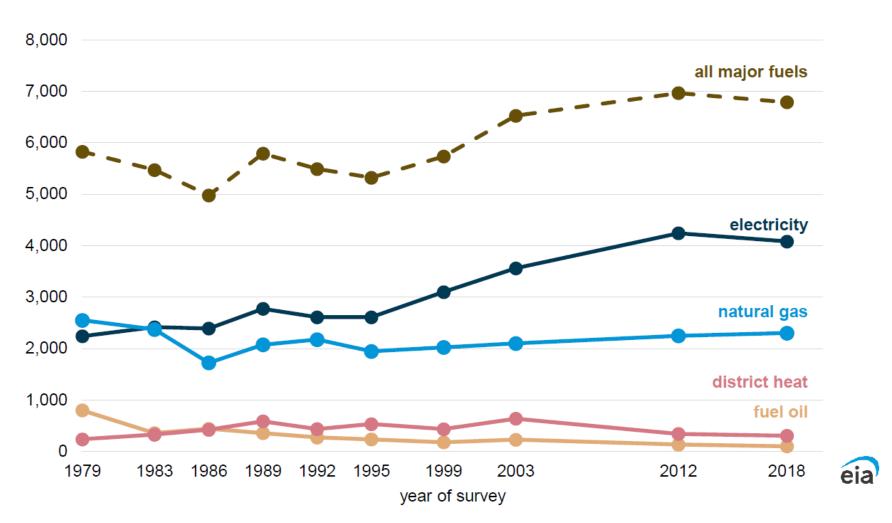

#### Overall Energy Usage

#### Energy consumption by major fuel, 1979–2018 trillion British thermal units

Data source: U.S. Energy Information Administration, Commercial Buildings Energy Consumption Survey

# Typical \$/SF for Buildings

Release date: December 2022

Table C6. Expenditures by census region for sum of major fuels, 2018

	Sum of maj				Sum of major	fuel expend	litures (doll	ars)				
	expenditur (million do				Per million Br	itish therma	F	Per square foot				
	North- east	Mid- west	South	West	North- east	Mid- west	South	West	North- east	Mid- west	South	West
All buildings	\$27,427	\$35,506	\$47,198	\$31,106	\$22.37	\$18.40	\$20.10	\$24.23	\$1.73	\$1.39	\$1.37	\$1.62
Principal building activity												
Education	\$3,127	\$3,962	\$5,969	\$2,817	\$16.78	\$15.69	\$19.82	\$24.74	\$1.23	\$1.03	\$1.20	\$1.24

### Typical EUI/SF for Buildings

Release date: December 2022

Table E2. Major fuels consumption intensities by end use, 2018

Major fuels energy intensity<sup>a</sup> (thousand Btu/square foot in buildings using any major fuel for the end use)

	Total	Space heating	Cooling	Venti- lation	Water heating	Lighting	Cooking	Refrig- eration	Office equip- ment	Com- puting	Other
All buildings	71.6	25.0	7.0	8.0	4.0	7.5	11.4	4.8	0.5	3.1	11.4
Principal building activity											
Education	62.7	27.6	7.3	4.8	3.7	5.5	3.3	1.8	0.5	2.4	8.8

#### How Do You Use Your Energy?

#### Major fuels consumption by end use, 2018

Data source: U.S. Energy Information Administration, Commercial Buildings Energy Consumption Survey Note: Btu = British thermal units

Release date: December 2022

#### Table E2. Major fuels consumption intensities by end use, 2018

Major fuels energy intensity<sup>a</sup>

(thousand Btu/square foot in buildings using any major fuel for the end use)

	Total	Space heating	Cooling	Venti- lation	Water heating	Lighting	Cooking	Refrig- eration	Office equip- ment	Com- puting	Other

#### Energy Savings Strategy - ERV

ERV's are a cost-effective means in reducing energy consumption without reducing indoor environmental quality.

- ERV's can reduce HVAC load by 30-70%
   (Center for Energy and Environment)
- Reduces main equipment sizing
- Couple this with the DOAS for added benefit
- Tie into environmental air exhaust to eliminate other equipment

## Controls & Commissioning

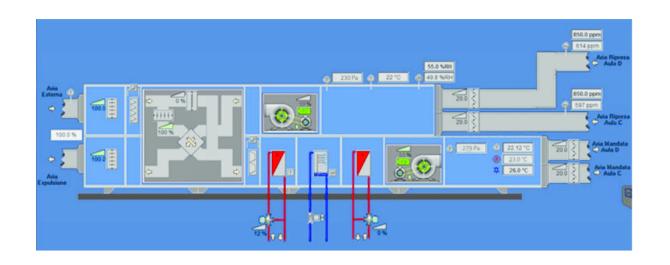

#### Controls

- Digital controls can reduce energy usage
- Couple BMS with IAQ sensors for real time feedback
- Advances in Al are coming to BMS manufacturers to allow anticipation of control needs
- Al can classify, group and analyze vast amounts of data to identify complex patterns
- Predictive maintenance will no longer be a thing of the future

#### Commissioning

- Typically cost 1.5% 2.5% of mechanical system cost
- Savings up to 5% 16% of energy costs
- Improved IAQ

- Better comfort
- Greater productivity or safety
- Extended equipment life
- Reduced need for repairs or warranty claims

#### Preventative Maintenance

Regular HVAC Inspections & Filter Replacements

Calibrate Thermostats & Sensors

Inspect & Tune Mechanical Equipment

# Benchmarking
